MUCC DONATION

BY JEFF VANTORRE

At the kids ice outing last month. We gave a generous donation to MUCC to go towards funding the kids camp. The board of directors voted to donate \$2500 to go towards kids camp this year. The funds will be used for operational issues, any maintenance that may be needed and possibly as scholarship money to help someone go to camp that otherwise may not have been able. Keeping and introducing kids to the outdoors is really important to the future of our outdoor activities that we all love.

We have always been a proud supporter of the camp and have over the years helped with sewer issues, helped renovate buildings, donated items of need and most importantly have sent many kids to camp over the years.

Being a part of making the camp successfully probably is the thing I am most proud of this club for. The future of hunting, fishing, and the outdoors will thank us for it.

EARN SOME MONEY FOR A GOOD CAUSE

BY JEFF VANTORRE

Are you looking for a few extra dollars to add to your wallet? Need to save up some money for gas in the boat? Or has your eye on some fishing gear that you've been looking at?

The LSCWA holds a bingo night once a week at the Rosemack bingo hall on Sunday's. The bingo night is the main fundraising program for our club, it helps us bring you the members our great seminar speakers, our club merchandise, and all the fun events we hold.

We are currently looking for a few volunteers to come out and work a few hours and help out. For more details come see me or any Board member at the meeting.

MISSION STATEMENT

To protect, preserve, and promote the walleye fishing in Michigan through conservation, education, and enhancing fishing opportunities for all; celebrating our tradition since 1976.

PRESIDENT'S CORNER

The days are starting to get longer, and the weather seems to be on the flip side, but we all know this is MICHIGAN and ANYTHING can Happen weather wise here in our great state.

Soon we will all be fishing the lakes and the river and taking advantage of the one of the biggest spawning runs in the world in our own backyard. Make sure you take the time now to go through all your equipment so it's ready and most importantly make sure all your safety equipment is in top notch working order.

Last month we had our annual kids ice outing at metro beach, it was a good turn out and the kids had a blast! Hot food and beverages were served, and each kid went home with a prize. Thank you to all that volunteered and helped with the event.

Speaking of events our derby season will be starting up next month in April and I know a lot of members are looking forward to getting back out again.

Our club's BIGGEST event and now the largest 1-day walleye tournament in the state, May Madness will be approaching very fast, we held our annual early registration at last month's meeting, and we had a great turn out as always. Currently we are over halfway filled, and we will be only hosting 100 boats.

Our club is doing a lot of great things and planning on great things to come in the future, just last month we made a donation and presented a check to the MUCC for what they see fit in the kid's camp. It's things like that should make you feel good to see our club stepping up and helping with an organization like the MUCC.

If you guys are heading out for last ice this season enjoy it but remember to please be safe. We know it can be some of the best ice fishing of the year but please use caution, no ice is safe ice. Good luck.

What Are Sea Lampreys?

SEA LAMPREYS (*Petromyzon marinus*) are primitive jawless fish native to the Atlantic Ocean. In the Great Lakes, there are several different types of native lampreys (including the silver lamprey, the American brook lamprey, and the northern brook lamprey) but the exotic sea lamprey is far larger and more predaceous than native lampreys.

Although lampreys resemble eels, lampreys lack jaws and possess only cartilage. Lampreys have a large sucking disk for a mouth and a well-developed sense of smell. The mouth is filled with sharp teeth that surround a file-like tongue. A lamprey's body has smooth, scaleless skin and two dorsal fins, but has no lateral line, no vertebrae, no swim bladder, and no paired fins.

How Did Sea Lampreys Spread into the Great Lakes?

Sea lampreys are native to the Atlantic Ocean, not the Great Lakes. Sea lampreys entered the Great Lakes system in the 1800s through manmade locks and shipping canals. Prior to the opening of the Welland Canal in 1829, and prior to its modification in 1919, Niagara Falls served as a natural barrier to keep sea lampreys out of the upper Great Lakes.

Sea lampreys were first observed in Lake Ontario in the 1830s. They did not invade Lake Erie prior to the improvements of the Welland Canal in 1919; sea lampreys were first observed in Lake Erie in 1921. After spreading into Lake Erie, sea lampreys moved rapidly to the other Great Lakes, appearing in Lake St. Clair in 1934, Lake Michigan in 1936, Lake Huron in 1937, and Lake Superior in 1938. By the late 1940s, sea lamprey populations had exploded in all of the upper Great Lakes causing severe damage to lake trout and other critical fish species.

11. TEAM FISHING

The practice of team fishing is defined as colluding and sharing information between anglers which are not currently fishing in the same boat as you during a monthly derby event. The lake st clair walleye association derby season offers club level fishing competition for members, restricts its boundaries to a limited area, and are not tournaments. The practice of team fishing for Lake St Clair Walleye Association derbies is prohibited. Sharing of information to help other anglers learn is highly encouraged after each monthly derby has concluded.

Final determination of derby rule violations and imposition of sanctions against the angler who has been determined to be in violation of rules shall be made by the Board of Directors.

13. These rules are in effect until changed by the board.
